

HIKS STAR
TECHNICAL SERVICES L.L.C
Your Partner in Reliable Electrical Solutions

COMPANY PROFILE / GO-TO-MARKET

Reliable Electrical & Engineering Solutions For Your Business Needs

Engineering Services, Discrimination/ Short-Circuit Studies, Harmonic Analysis , Energy Audits, Power Quality Analysis, Thermography , Electrical Safety Audit , Earth Pit Study , Arc Fault Studies , Industrial Automation Solutions (PLC & SCADA Systems), LV Switchgear & Controls, Troubleshooting & Communication for intelligent MCCs , Communication Architecture using different Protocols and Gateways Systems for Oil & Gas, Process Industries, Water & Electricity, Infrastructure, Specialized Buildings and Public Utility projects.

Engineering built for performance.

Service Provider for simple distribution boards to complex intelligent MCCs, HIKS STAR delivers practical, standards-aligned electrical and engineering solutions focused on quality, safety, operational reliability and customer satisfaction

Customized Engineering

We Build your Imaginations & Thinking with our capabilities.

Engineering Services

Keep your System Healthy & Stable round the clock with our services.

Modification & Retrofitting

Load management, expansion and site modification.

Cable Laying & Terminations

Cable Laying & Termination made easy with our experienced & dedicated teams and advanced tools

● Power
Quality Analysis

● Troubleshooting of
Intelligent MCC, VFD
& Soft Starter Panels

● PLC, SCADA &
Process Automation

● Engineering
Services

HIKS STAR
TECHNICAL SERVICES L.L.C
Your Partner in Reliable Electrical Solutions

About HIKS STAR

HIKS STAR Technical Services L.L.C. is a UAE based technical services company delivering advanced engineering services, LV Switchgear Solutions, PLC/SCADA Solutions and other digital electrical solutions across the Middle East.

The company focuses on quality, customer satisfaction and customized solutions for industrial and project-based requirements

- ISO 9001:2015 compliant procedures and processes
- Go Green focus through a paperless operating approach
- Technical solutions from DBs to intelligent MCCs
- Engineering services for installation, distribution, transmission and troubleshooting

Capabilities & Technical Profile

A concise capability profile for B2B clients, MEP/EPC contractors, consultants, utilities and industrial facilities seeking dependable engineering, LV switchgear, control and automation partners.

CORE SOLUTIONS & SERVICES

Category	Scope
POWER MANAGEMENT	Controlling and optimizing electrical power to reduce consumption, cut costs, and improve efficiency by performing (Power Quality Analysis , Thermography , Earth-pit Testing etc)
CONTROL PANELS	MCCs; fixed and draw-out conventional or intelligent systems; pump controls; DOL, Wye-Delta, auto transformer, soft starter, VFD, instrumentation, AHU / AC and chiller panels.
PLC & SCADA	PLC & SCADA Solutions for process industries in coordination with intelligent MCC panels.
ENGINEERING SERVICES	Installation, distribution, transmission and troubleshooting services with site modification, retrofitting and maintenance support.

ENGINEERING ADVANTAGES

Complete Engineering Services For Every Industry

We provide a comprehensive range of engineering solutions designed to enhance efficiency, safety, and sustainability.

Energy Audits & Diagnostic Solutions

Energy Audits , Electrical Audits, PQ Analysis Thermography.

Electrical Services, Testing & Modernization Solutions

LV Switchgear Service , Retrofit Solutions, Capacitor Bank Service and Maintenance,VFD, and other control system communication.

Safety & Reliability

Proper insulation, effective earthing, circuit breakers, fuses, interlocks, arc control and fast fault isolation.

LV switchgear assemblies

SCADA and control integration

Sectors Served

Oil & Gas Industry | Process Industries | Water & Electricity Projects | Infrastructure Projects | Specialized Building Projects | Public Utility related Projects
